Dear Friend:—

The average flower lover is interested in fall planting, but often hesitates to plant in the fall because of being unacquainted with the varieties that will do well when planted at that time. This circular contains a list of choice varieties for the home ground, especially adapted to fall planting. We recommend the stock offered as being high in quality, and low in price.

Do not fail to try a few of the Colchicums offered in the colored pamphlet. They can be used to advertise your business, to give to a sick friend, to beautify your property, and in many other ways. They give lots of pleasure wherever they go. They are perfectly hardy, and when planted outside, will come up and bloom each year.

We have had many letters of recommendation from people who bought them last year, and we will guarantee that they will make good with you.

The Pussy Willow is another good item. Enclose your property with a hedge; plant some fruit trees and bulbs.

There is nothing you can buy for your home ground that will return as much in pleasure, satisfaction, health and increased valuation of your property as an investment in nursery stock will. Be sure to plant some this fall. We will guarantee that our nursery stock will give you satisfaction.

Yours very truly,

SPRING HILL NURSERIES

ORNAMENTAL HEDGES

California Privet

Is the Best and Cheapest Fence

One hundred plants set eight inches apart, the proper distance for planting, will make a fence 66 feet long. Using our 18 to 24 inch size would cost only \$6.00. This is much less than any other fence would cost.

In addition to costing less than any other fence you could buy, it is superior to any fence you could build. If they are given fairly good soil they will grow dense and compact right down to the ground. It is free from insects or injurious diseases of any kinds and may be pruned to any desired form or shape. Our plants are extra fine this year, are well branched, especially for hedge purposes and the price is very low. We will guarantee the quality of our plants to be equal to the best that can be purchased anywhere.

It Is the Most Beautiful and Ornamental

There is no fence that adds so much charm and dignity to the surroundings of the home as a well kept hedge of California Privet. Go into the residence part of any of our great cities, and you will find this is the fence that almost invariably surrounds the palatial and aristocratic homes.

Plant in either Spring or Fall. If planted in single row, space the plants 8 inches apart. If planted in double rows, space the plants 8 inches apart zig zag from one row to the other.

Amoor River Privet

Hardest of all hedge plants. Beautiful upright growth and makes a very compact beautiful hedge. 18 to 24 inches, \$10.00 per 100; 2 to 3 feet, \$14.00 per 100.

A Barberry Hedge Untrimmed

Ibodium Privet (Perfectly Hardy)

For severe climates Ibodium privet is the coming hedge plant. For Northern New York, Michigan, Wisconsin, Northern Illinois and Iowa, Nebraska and Southern South Dakota and Minnesota this will be the hedge plant of the future. It is as hardy as the hardiest privet and has all the characteristics of the famous California privet. It holds its leaves till late in the winter, presents at all times a rich green appearance and is a quick grower.

This is a new introduction that we have tried out for several years and found to be all and more than is claimed for it.

We have only a limited supply. Plant 8 inches apart. Price, 12 to 18 inch plants, \$10.00 per 100. Extra heavy 2 to 3 feet, \$14.00 per 100.

Ibota Privet

Excellent for hedges because of its upright habit, beautiful narrow green leaves, clusters of fragrant white flowers, and extreme hardiness. Plant 8 inches apart. 18 to 24 inches, \$10.00 per 100; 2 to 3 feet, \$14.00.

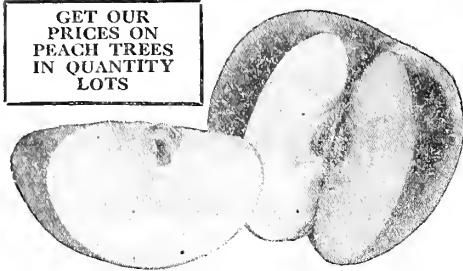

Barberry, Japanese

NOTE—This is not the Common Barberry and can be planted anywhere without danger of being destroyed by the government.

(Berberis Thunbergii). We consider the Japanese Barberry the best hedge plant in existence. It is beautiful throughout the year; its abundant crop of bright red berries makes it even more attractive in the winter than the summer. As an untrimmed hedge it requires no attention except an occasional cutting of a few straggling branches. The natural growth is so dense and even that it forms a perfect hedge without shearing. For a hedge, plant in single row, 15 inches apart.

The Japanese Barberry is hardy almost anywhere in this country. Price, 12 to 18 inch plants, 15c each; 50 for \$7.00; 100 for \$12.50.
